

## **IMMIGRATION RULES**

Russian Immigration laws are stringent; ensure you have the appropriate visa for successful entry into the Russian Federation.

Passport and original certificates are the properties of concerned students and should not be given to either contractors/consultants or foreign authorities for safe custody. No one has the authority to confiscate passports and students must always keep their passports in their possession. Police officials often demand to see the passport, visa and registration.

All students must register three days after entry into the Russian Federation. Some students have to leave the country for failing to register within the stipulated period of three days. The university concerned or contractor/consultant generally takes care of the registration process of foreign students.

To circumvent the aforesaid situation, it is requested that all Ugandan students studying in Russian universities may be advised to immediately apply for new passports in case their existing passports are damaged/torn to avoid any such incidents. Students may ensure that their all travel documents are intact and in order before commencement of journey outside/into Russian territory.
